leofranc holford strevens explores time measurement and the organisation of time into hours days months and years using a range of fascinating examples from ancient rome and julius caesar s leap year to the 1920s project for a fixed easter

an anniversary edition of a now classic survey of the origin and nature of the universe features a new introduction by the author and a new chapter on

the possibility of time travel and wormholes in space

a brief history of the philosophy of time is a concise and accessible survey of the history of philosophical and scientific developments in understanding time and our experience of time it discusses prominent ideas about the nature of time plus many subsidiary puzzles about time from the classical period through the present

our critically acclaimed smash hit cartographies of time is now available in paperback in this first comprehensive history of graphic representations of time authors daniel rosenberg and anthony grafton have crafted a lively history featuring fanciful characters and unexpected twists and turns from medieval manuscripts to websites cartographies of time features a wide variety of timelines that in their own unique ways curving crossing branching defy conventional thinking about the form a fifty four foot long timeline from 1753 is mounted on a scroll and encased in a protective box another timeline uses the different parts of the human body to show the genealogies of jesus christ and the rulers of saxony ladders created by missionaries in eighteenth century oregon illustrate bible stories in a vertical format to convert native americans also included is the april 1912 marconi north atlantic communication chart which tracked ships including the titanic at points in time rather than by their geographic location alongside little known works by famous figures including a historical chronology by the mapmaker gerardus mercator and a chronological board game patented by mark twain presented in a lavishly illustrated edition cartographies of time is a revelation to anyone interested in the role visual forms have played in our evolving conception of history

the aim of this book is to explain in simple language what we know about time and about the history of time it is shown that the briefest as well as the lengthiest history of time can be described in one or two pages the second purpose of the book is to show that neither entropy nor the second law of thermodynamics has anything to do with time the third purpose is to educate the lay reader how to read popular science books critically towards this goal detailed reviews of four books on time are presented there are many popular science books on time on the beginning of time and the end of time this book is unique in the following two senses it explains in simple terms what time is and why it is not related to entropy it critically reviews a few popular science books which perpetuate all kinds of unfounded ideas about the relationship between time and the second law

discover the fascinating history of time clocks calendars and time zones a history of time reveals the journal of the development of how humans keep track of time including daylight saving time clock history calendar history history of time zones sundial hourglass history daylight saving time

2022 national indie excellence awards winner history general inherently interesting unique and highly recommended addition to personal professional community college and academic library physics of time scientific measurement history collections and supplemental curriculum studies lists midwest book review a wonderful look into understanding and recording time orzel s latest is appropriate for all readers who are curious about those ticks and tocks that mark nearly every aspect of our lives booklist a thorough enjoyable exploration of the history and science behind measuring time foreword reviews it s all a matter of time literally from the movements of the spheres to the slipperiness of relativity the story of science unfolds through the fascinating history of humanity s efforts to keep time our modern lives are ruled by clocks and watches smartphone apps and calendar programs while our gadgets may be new however the drive to measure and master time is anything but and in a brief history of timekeeping chad orzel traces the path from stonehenge to your smartphone predating written language and marching on through human history the desire for ever better timekeeping has spurred technological innovation and sparked theories that radically reshaped our understanding of the universe and our place in it orzel a physicist and the bestselling author of breakfast with einstein and how to teach quantum physics to your dog continues his tradition of demystifying thorny scientific concepts by using the clocks and calendars central to our everyday activities as a jumping off point to explore the science underlying the ways we keep track of our time ancient solstice markers which still work perfectly 5 000 years later depend on the basic astrophysics of our solar system mechanical clocks owe their development to newtonian physics and the ultra precise atomic timekeeping that enables gps hinges on the predictable oddities of quantum mechanics along the way orzel visits the delicate negotiations involved in gregorian calendar reform the intricate and entirely unique system employed by the maya and how the problem of synchronizing clocks at different locations ultimately required us to abandon the idea of time as an absolute and universal quantity sharp and engaging a brief history of timekeeping is a story not just about the science of sundials sandglasses and mechanical clocks but also the politics of calendars and time zones the philosophy of measurement and the nature of space and time itself for those interested in science technology or history or anyone who s ever wondered about the instruments that divide our days into moments the time you spend

reading this book may fly and it is certain to be well spent

time is a fascinating subject and one which affects our lives in many ways this book covers a lot of aspects of the subject first how did measurements of time like seconds minutes hours and years develop next what is the history of timekeeping mechanism from ancient water clocks to mechanical mechanisms atomic clocks and much more lastly what are some of the stranger aspects or anomalies of time such as premonitions how time and space work and possible time travel stories and philosophical questions like does the future already exist i wanted this book to be a comprehensive volume on time and so included lots of different stories and understandings about time which indicate we may not fully understand it yet

why do we measure time in the way that we do why is a week seven days long at what point did minutes and seconds come into being an introduction to time this work presents original research and a range of tables and diagrams to fully explain the concepts involved

a brief history of time notebook 6 9 inches 110 pages white paper interior with a nice design

what is time how did time come into existence how does time exist we dig into these questions as we examine the reality and existence of time and our existence in time from its beginning its end to how the enemy manipulates time other topics handled in the book include time traveltime structuretimelinesthe reader is empowered and given knowledge on how to guard their timeline and structure and with the knowledge of the alpha dimension of god in time and through time

in this intriguing book g j whitrow traces the evolution of our general awareness of time and its significance from the dawn of history to the present day his absorbing study ranges from ancient egypt and persia greece and israel to the islamic world india and china and europe andamerica showing the different ways time has been perceived by various civilizations

focusing on the period from 1820 to 1920 keeping watch details the far reaching changes in american society brought about by the transition from natural

to mechanical sources of time from farmers almanacs and religious formulations of time to regional time zones synchronized watches and factory punch clocks michael o malley show how the pressures of industrialization the emergence of the telegraph and the spread of railroads led to a demand for uniform consistent schedules

over the course of the fifteenth century the low countries transformed europe s economic political and cultural life innovative and influential cultural practices emerged across the region in flourishing courts towns religious houses guilds and confraternities whether in visual culture music devotional practice or communal rituals the thriving cultures of the low countries wrestled with time both through explicit measurement and reflection and in the rhythms of social and religious life this book offers a deeper understanding of how time was structured and experienced by different constituencies through a series of detailed readings of diverse cultural objects and practices ranging from woodcuts and painted altarpieces to early print books and to the use of polyphony in the liturgy individual chapters are devoted to life in the university towns of louvain and ghent the liturgical rituals at cambrai cathedral and the rich pageantry that marked the courts of philip the good and the new burgundian rulers what emerges is a complex temporal landscape in which devotional and secular practices and experiences merged into a new fullness of time

many people have felt that they couldn t really understand a brief history of time this book reveals the secrets of why it s difficult to understand a brief history of time after knowing about these secrets people will suddenly but clearly realize it turns out to be quite reasonable and fair that they couldn t really understand that book with this realization people can and will be well aware it turns out that they shouldn t have felt discouraged or disappointed for having not really understood a brief history of time why have so many people come across such great difficulties in understanding a brief history of time what are the root causes behind these difficulties are there impassable obstacles to defeating these difficulties can we overcome these difficulties these puzzles are unfolding to you to me and to all of us
